Software Engineer

C# .NET Software Developer with a solid foundation in designing and implementing backend solutions within the .NET framework. Proficient in creating maintainable, efficient, and scalable code, with hands-on experience in database integration, API development, and application optimization. Skilled in collaborating with cross-functional teams in Agile environments, adapting quickly to project needs, and committed to continuous growth in technical expertise and industry best practices.

Core Competencies: C#, .NET Framework, ASP.NET, SQL, RESTful API, Entity Framework, LINQ, Agile methodologies

WORK EXPERIENCE

Kaizen Gaming • 03/2024 – Present

Software Engineer .NET

Farfetch • 09/2021 – 03/2024

Software Engineer .NET

- Spearheading backend development using .NET and frameworks like Kafka, SQL, Redis, MongoDB, and Docker, driving solutions for high-demand environments.
- Responsible for monitoring and troubleshooting microservices, identifying and resolving performance issues to maintain stability and reliability.
- Managing CI/CD deployments independently, optimizing the development pipeline to support continuous integration and deployment.
- Leading the design and implementation of new features in the team's cluster, ensuring alignment with company requirements and long-term scalability.
- Applying advanced backend optimization techniques to enhance system performance, with a focus on supporting robust and scalable architecture.

EDUCATION

Bachelor's Degree in Software Engineering

Universidade do Minho

CERTIFICATIONS

Cambridge English Certificate

PROJECTS

Choose and Chill

Software that recommends movies and shows tailored to your personal preferences.

Oddlify

AI-powered software that predicts football match outcomes.

SKILLS

Content Creation, Docker, English, Entrepreneurship, Focus, Kafka, MongoDB, .NET, Redis, SQL, Strong Communication Skills, Team Work
